

**Problem:**

1. Which of the following shapes are rectangles? Why?
2. Which of the following shapes are parallelograms? Why?
3. Which of the following shapes are rhombi? Why?

A

B

C

D

E

**Answers:**

1. B, D, and E are rectangles since all the angles in these shapes are right angles and the opposite sides are parallel and congruent.
2. B, C, D, and E are parallelograms since the opposite sides in the shapes are parallel and congruent.
3. D is a rhombus because all four sides are congruent.
